

Textbook OF THE Ear Nose AND Throat

EDITED BY
**Chris de Souza Marcos V Goycoolea
Carlos B Ruah**

From the
Foreword:
by **MICHAEL M PAPARELLA MD**

Minnesota Ear Clinic, Clinical Professor and Chairman Emeritus
Department of Otolaryngology, University of Minnesota, International Hearing Foundation

The editors of 'Textbook of the Ear Nose and Throat' are to be congratulated for this compilation of practical chapters relating to an understanding of diagnosis and treatment of the many diseases included in the field of otolaryngology and head and neck surgery.

Practitioners in otolaryngology and head and neck surgery need to remain current in order to help patients. There are many new developments in otology and head and neck surgery; for example in the diagnosis and treatment of Meniere's disease and the many other inner ear diseases that can mimic Meniere's disease. Also methods of treating otitis media, based on an improved understanding of its pathology and pathogenesis are included in these chapters.

Thyroid disease is an important part of head and neck diseases, and this too is covered in this concise and practical textbook for students of otolaryngology and head and neck surgery. Students of otolaryngology and head and neck surgery exist along a continuum. For example, a medical student who needs to understand the diseases of the speciality would be helped by this textbook. A resident or registrar who is attempting to become knowledgeable in this speciality would also be benefited by this textbook. Less experienced and more experienced practitioners of otolaryngology, either in the private sector or in an academic environment, would benefit by this book.

CONTENTS

1 OTOTOLOGY	2.10 The physiology of mastication	3.14 Epistaxis
1.1 Embryology of the ear	2.11 Diseases of the esophagus	3.15 Facial fractures
1.2 Anatomy of the ear	2.12 Foreign bodies and methods of inspection of the aerodigestive tract	3.16 Cerebrospinal fluid rhinorrhea
1.3 Neuroanatomy and physiology of the ear	2.13 The retropharyngeal, parapharyngeal and submandibular fascial spaces	3.17 Craniofacial pain
1.4 Examination of the ear	2.14 Benign swellings presenting in the neck	3.18 Endoscopic sinus surgery
1.5 Evaluation of the auditory system	2.15 Non-neoplastic diseases of the salivary glands	4 CANCER IN ENT
1.6 Evaluation of the vestibular system	2.16 The thyroid gland	4.1 An approach to cancer of the head and neck
1.7 Evaluation of the facial nerve	2.17 The parathyroid glands	4.2 Cancer of an unknown primary site
1.8 Vascular evaluation in otology	3 RHINOLOGY	4.3 Cancer of the oral cavity
1.9 Diseases of the ear : Inherited diseases	3.1 Embryology of the nose	4.4 Cancer of the larynx
1.10 Diseases of the ear : Acquired diseases	3.2 Anatomy of the nose	4.5 Cancer of the thyroid gland
1.11 Diseases of the ear : Postnatal diseases	3.3 Examination of the nose and paranasal sinuses	4.6 Neoplasms of the salivary gland
1.12 Otolgic emergencies	3.4 Congenital malformations of the nose	4.7 Cancer of the esophagus
2 LARYNGOLOGY	3.5 Infections of the external nose	4.8 Cancer of the nasopharynx
2.1 Embryology, anatomy and physiology of the larynx	3.6 Rhinitis	5 OTHER TOPICS IN ENT
2.2 Acute laryngitis	3.7 Sinusitis	5.1 Basic ENT examination and equipment
2.3 Hoarseness and other disorders of the voice	3.8 Nasal polyps	5.2 Conventional radiology in ENT
2.4 Vocal cord paralysis	3.9 Mycosis of the nose and paranasal sinuses	5.3 Fine needle aspiration cytology
2.5 Tracheostomy	3.10 Granulomatous diseases of the nose and paranasal sinuses	5.4 Recent imaging methods in ENT
2.6 Inflammatory diseases of the oropharynx and adenoids	3.11 Cysts and tumours of the jaws, the nasal cavity and the paranasal sinuses	5.5 Lasers in otolaryngology
2.7 Tonsillectomy and adenoidectomy	3.12 Cysts and tumours of the nasopharynx	5.6 Granulomatous disorders in ENT
2.8 Tetanus, diphtheria and myasthenia gravis in ENT	3.13 The nasal septum	5.7 Acquired immune deficiency syndrome (AIDS)
2.9 Anatomy of the esophagus and trachea		5.8 Sleep apnea
		5.9 Gastroesophageal reflux disease (GERD)
		5.10 Halitosis
		5.11 Submucous fibrosis
		5.12 Stridor
